

Martha Ann Bell, Ph.D., is a professor of psychology at Virginia Tech and a professor of basic science at the Virginia Tech Carilion School of Medicine. Her research specialization is developmental cognitive neuroscience and she examines developmental change in frontal lobe functioning using both behavioral and electrophysiological methodology. Her work is funded by the National Institutes of Health's (NIH's) Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD) and is focused on individual differences in the development of executive function and emotion regulation from infancy through middle childhood. Dr. Bell is the former editor of the journal *Infancy* and is currently on the editorial board of *Current Directions in Psychological Science*. She is a fellow of the American Psychological Association (Division 7, Developmental) and the Association for Psychological Science. She received her M.S. in child and family studies from the University of Tennessee and her Ph.D. in human development from the University of Maryland.
